

# My Family

## Explore Green World System - Class 3

---

A family is a group of people who love and care for each other. It is the first place where we learn many things — like sharing, loving, and respecting others. Every family is special because it is made up of different members who play different roles.

Most families have parents and children. Parents are the mothers and fathers who take care of the children. Sometimes, families also have grandparents, uncles, aunts, and cousins. These people all belong to what we call our *extended family*.

***Did You Know?** In many families, grandparents tell stories about when they were children. This helps us understand our family's history!*

## Why is Family Important?

Our family gives us love, support, and protection. They help us grow up to be kind and responsible people.

- They teach us good values.
- They help us when we need them.
- They celebrate happy moments with us.
- They keep us safe.

## Members of My Family

Every member of the family has a unique role:

Family Member	Role
Mother	Takes care of the home and family, cooks food, loves and supports everyone.
Father	Works to provide for the family and helps in taking care of children.
Grandparents	Share stories, wisdom, and take care of grandchildren.

---

## Let's Do Together!

**Exercise 1:** Draw a picture of your family. Label the members and write one thing you like about each person.

**Exercise 2:** Talk with your family members and ask them about their childhood. Share one interesting story with your class.

Remember, your family is your first green world — a place full of love, learning, and happiness!
